Meeting the Needs of Your Medical Staff^{and} Organization

Struggling with getting e-signing implemented?

Has your strategic plan reached the stage for the implementation of physician documentation and order entry?

Physicians may have a difficult time changing their workflow to accommodate online signature, online results, ordering and documentation.

Features such as: A Physician Desktop, Notifications, Orders (Sets), Documentation Templates, Rounds e-Signing and Result Viewing are all carefully approached and designed prior to any system build to ensure proper build content.

CPEOPLE's licensed clinicians and informatics professionals will provide you with clinical experience in a hospital setting and expertise in advanced clinical applications ensuring a successful outcome.

Our staff understands the challenges and complexities of providing safe, affordable, high quality care in today's market. Patient safety, best practices and efficient workflows are the focal points when we assist you with your complex implementation of physician applications. This will be accomplished by providing your physicians with an efficient system.

Our proven approach consists of listening to the needs of the organization as well as the needs of the physician. From this we will scope a recommended approach to the implementation of these systems or enhancements to existing systems. From there CPEOPLE will assist your team in the design, build, testing, training and LIVE stages of your project.
